According to CDC, more than half of the sports injuries in children are preventable. Hootman et al collected data over a 16 year period and found that injury rates were statistically more significant in games than in practice. They calculated the injuries per 1000 A-E (athlete-exposure per game or practice), and they reported about 13.8 injuries per 1000 A-E in games, and about 4.0 injuries per 1000 A-E in practice.
