Spray Gun cleaning Machines have been designed to give operators a choice of facilities, whilst ensuring basic quality features are consistent throughout the range. The robust construction, featuring air extraction, stainless steel wash tanks and brass distribution bars, makes the unit suitable for both solvent and water based cleaning agents. A powerful air operated, self reciprocating pump delivers up to 12 ltrs /min with an air input pressure of 75-100 psi and consumes approx 4/7 cfm. This ensures a high volume of solvent is delivered through the spray jet nozzles and optimises the cleaning performance.
