Spun bonded filter cartridge is a type of filter element typically used in water filtration systems. It is made by spinning and bonding polypropylene fibers together to form a cylindrical cartridge. The spun bonded filter cartridge has a high dirt holding capacity and is effective in removing sediment, dirt, rust, silt, and other particulate matter from the water. It is commonly used as a pre-filter in residential and industrial water filtration systems to protect more sensitive downstream filters and equipment from clogging and damage. The construction of the cartridge allows for optimal filtration efficiency, long service life, and ease of replacement when necessary.
