Solid State Relays (SSR) is an electronic state relay. Its internal structure is an integrated mounting package of semiconductor elements and electronics circuit board. Its main characteristics are resistant to high voltage and high current, contactor less (no noise), good isolation and ease of heat evaporation. Its main application includes: Industrial automation, home appliances, Building Automation etc.

Asia-Pacific occupies the largest market share with 54%. It is followed by North America and Europe. The global market for solid state relay is dominated by a few large vendors. Companies such as Panasonic, Crydom, OMRON and Carlo gavazzi are the key manufacturers. The top 5 have about 34% market shares. In terms of product, PCB mount is the largest segment, with a share over 47%. And in terms of application, the largest application is industrial equipment, followed by home appliance.
