SSY elastic fiber is a PT side-by-side composite spinning fiber, a two-component polyester fiber, which uses the different shrinkage of the two components to form a permanent elastic crimped structure. Before processing, SSY fiber has almost no elasticity like ordinary polyester yarn, but after high-temperature dyeing and washing, it will produce permanent curl, which will make the fabric elastic. It has excellent elasticity and elastic recovery, unique feel and gloss, anti-fouling and fluffy, resistance to sunlight and chlorine, good moisture absorption and quick drying. After being processed into a fabric, the fabric surface is smooth and smooth, with good drapability, anti-wrinkle and non-ironing, stable size, moisture absorption and quick drying, moderate elasticity, and comfortable wearing.
