The global Stainless Steel Double Edge Blade market size is predicted to grow from US\$ 722 million in 2025 to US\$ 816 million in 2032; it is expected to grow at a CAGR of 2.3% from 2026 to 2032.

A stainless steel double edge blade is a shaving blade made from stainless steel and designed for use in double edge safety razors. It has two sharpened cutting edges and is commonly used for traditional wet shaving, personal grooming, and professional barber services. Compared with carbon steel blades, stainless steel blades offer better corrosion resistance, longer storage life, and more stable performance in wet shaving environments. Many products are further coated with platinum, chromium, tungsten, ceramic, or PTFE materials to improve smoothness, sharpness retention, durability, and skin comfort. They are one of the mainstream product types in the double edge blade market.

Global production capacity is approximately 8 billion units.

In 2025, global sales reached approximately 5.6 billion units, with an average price of around US\$ 131 per k units, gross margin around 19%.

The stainless steel double edge blades represent the mainstream and more durable segment of the double edge razor blade market. Their advantages include corrosion resistance, stable shaving performance, long shelf life, and compatibility with multiple coating technologies. Although electric shavers and cartridge razors remain strong competitors, stainless steel double edge blades continue to gain support from cost-conscious consumers, wet shaving enthusiasts, professional barbers, and sustainability-focused users. Future competition will focus on sharpness, smoothness, coating quality,

rust resistance, packaging, brand reputation, and channel coverage. The market is expected to maintain steady demand with opportunities in premium and eco-friendly grooming segments.

Market Trend

The stainless steel double edge blade market is benefiting from the revival of safety razors, traditional wet shaving, and sustainable grooming habits. Consumers are increasingly choosing double edge blades because they are economical, recyclable, and compatible with long-lasting metal razors. Stainless steel blades are becoming the dominant preference due to their rust resistance, consistent quality, and suitability for global distribution. Product trends include premium coated blades, improved edge grinding, smoother shaving performance, recyclable packaging, and variety packs for user comparison. E-commerce, shaving communities, and barber-focused retail channels are also helping international brands and niche products reach a wider consumer base.

Market Drive

The main driver of the stainless steel double edge blade market is demand for affordable, durable, and environmentally friendlier shaving products. Compared with cartridge razor systems, double edge blades have a much lower replacement cost, making them attractive to both individual consumers and professional barbers. Stainless steel improves corrosion resistance and product shelf life, which is important for retail storage, export trade, and humid bathroom environments. Rising awareness of plastic waste from disposable razors is also encouraging consumers to adopt metal safety razors and recyclable blades. Growth in men's grooming, premium personal care, and online retail further supports market expansion.

Upstream and Downstream

The upstream supply chain of stainless steel double edge blades includes stainless steel strip, coating materials, grinding wheels, polishing compounds, blade wrapping paper, plastic or metal dispensers, packaging materials, and precision blade manufacturing equipment. Key upstream suppliers include stainless steel producers, coating material companies, abrasive suppliers, machinery manufacturers, and packaging companies. Midstream manufacturers are responsible for blade stamping, heat treatment, grinding, honing, coating, cleaning, inspection, packaging, and branding. Downstream customers include shaving product brands, safety razor

manufacturers, barbershops, supermarkets, pharmacies, wholesalers, e-commerce platforms, grooming subscription services, and individual wet shaving consumers.
