A stainless steel nipple is a type of stainless steel pipe fitting.

Nipples are categorized into metal and plastic types, and the selection depends on the intended use and environmental conditions. Both types play roles in systems that transport fluids such as pipes and tubes, serving functions like connection, extension, and change in direction.

Stainless steel nipples, among metal nipples, exhibit excellent corrosion resistance and durability, making them suitable for high-temperature and high-pressure environments. They resist corrosion even when exposed to acids and chemicals. As crucial components in piping systems, they find widespread applications in various fields, including water, gas, and industries such as food and pharmaceuticals.
