A stainless steel single-stage centrifugal pump is a centrifugal transfer pump with stainless steel as its structural and sealing material. It is a high-efficiency conveying device with a single-stage (single-stage impeller) design. It uses a high-speed rotating impeller to draw liquid in from the pump inlet, raises the pressure under centrifugal force, and discharges it from the pump outlet. It is widely used in low- to medium-pressure conveying scenarios in chemical, food, pharmaceutical, water treatment, and metallurgical industries. Upstream raw materials for stainless steel single-stage centrifugal pumps include stainless steel materials, sealing and wear-resistant materials, bearings, etc. The midstream consists of stainless steel single-stage centrifugal pump manufacturers, while the downstream mainly consists of the pharmaceutical, food, and chemical industries.
