A start-stop lead-acid battery is a battery specifically designed for use in the start-stop system of modern vehicles. The start-stop system automatically shuts down the engine when the vehicle is temporarily stopped (such as at a red light or in a traffic jam) and quickly restarts the engine when needed, saving fuel and reducing emissions. The start-stop lead-acid battery provides the necessary power support for this system, ensuring that the engine can be started and stopped frequently while providing a continuous power supply for the on-board electronic equipment.
