A starter pistol, also known as a starter pistol or blank gun, is a firearm specifically designed for firing blanks or cartridges with no projectile. It is commonly used to signal the start of races, particularly in sports such as track and field.

Starter pistols are loaded with blanks, which are cartridges that contain gunpowder but no bullet. The primary purpose of a starter pistol is to produce a loud and distinctive sound that can be easily heard by participants and spectators. When fired, they produce a loud noise and a flash of light, signaling the beginning of an event. Some starter pistols are designed with features to enhance visibility, such as bright colors or reflective materials, making them easily identifiable by officials and participants.

Starter pistols are widely used in various sports events, including track and field competitions, swimming meets, and other racing sports where a clear and audible

signal is needed to indicate the start of a race. The loud report of the starter pistol serves as a reliable and standardized way to commence races, ensuring fairness and accuracy in timing.
