The global Static RAM (Static Random-Access Memory?Sram) market size is predicted to grow from US\$ 425 million in 2025 to US\$ 563 million in 2031; it is expected to grow at a CAGR of 4.8% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

SRAM (static RAM) is random access memory (RAM) that retains data bits in its memory as long as power is being supplied. Unlike dynamic RAM (DRAM), which stores bits in cells consisting of a capacitor and a transistor, SRAM does not have to be periodically refreshed. Static RAM provides faster access to data and is more expensive than DRAM. SRAM is used for a computer's cache memory and as part of the random access memory digital-to-analog converter on a video card.

The global static random access memory (SRAM) market is dominated by Cypress, Renesas, ISSI, etc. The top three players account for about 81% of the market share.

The United States is the largest market for static random access memory (SRAM) with a market?? ?????????????? ??
