Abstracts

According to this study, the global Static Transfer Systems (STS) market size will reach US\$ 5808 million by 2031.

A static transfer switch uses power semiconductors such as Silicon-controlled rectifiers (SCRs) to transfer a load between two sources. Because there are no mechanical moving parts, the transfer can be completed rapidly, perhaps within a quarter-cycle of the power frequency.

ABB was the global largest manufacturer in the Static Transfer Switch market, accounted for maximal market share of 17% in the global market.
