A Steel Cylinder Self-Contained Breathing Apparatus (SCBA) is a crucial piece of personal protective equipment used primarily in hazardous environments where breathable air is not available. It consists of a high-pressure steel cylinder filled with compressed air or other breathable gases, a pressure regulator, a facepiece with a built-in respiratory protection system, and a harness for securing the cylinder to the user. The SCBA allows individuals, such as firefighters and emergency responders, to work safely in environments contaminated by smoke, chemicals, or low oxygen levels. The steel cylinder provides durability and resistance to damage, ensuring a reliable supply of air for the wearer while they perform critical tasks in dangerous conditions.

The global Steel Cylinder Self-contained Breathing Apparatus (SCBA) market size is projected to grow from US\$ 739 million in 2024 to US\$ 1019 million in 2030; it is expected to grow at a CAGR of 5.5% from 2024 to 2030.
