The global Steel Elevator Bucket market size is predicted to grow from US\$ 874 million in 2025 to US\$ 1242 million in 2032; it is expected to grow at a CAGR of 5.2% from 2026 to 2032.

Steel elevator buckets are critical components in bucket elevators for vertically conveying bulk materials (e.g., grains, ores, cement). Made of high-strength steel (e.g., Q235) or wear-resistant alloys (e.g., NM360), they feature designs like deep, shallow, or skewed profiles to optimize material flow. Surface hardening (e.g., tungsten carbide coating) enhances durability in abrasive environments. Widely used in grain processing, mining, and construction, they comply with ISO 9001 standards, with variants meeting explosion-proof or corrosion-resistant requirements.

The market is driven by mining and infrastructure, with key players like Ryson International. Trends include: 1) Lightweight high-strength steel; 2) IoT-enabled wear monitoring; 3) Custom designs for sticky materials. Steel price volatility and plastic substitution pose challenges, but steel dominates heavy-duty applications. Asia-Pacific leads growth due to industrial expansion.
