The global Step-down Sandblasting Machine market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

The step-down sandblasting machine is a device commonly used for surface treatment, which uses high-speed flow of compressed air to spray sand or other abrasives onto the treated surface to remove surface dirt, oxidation, paint, rust, etc. Compared with the traditional sandblasting machine, the depressurized sandblasting machine reduces the pressure of compressed air, making the sand injection speed and energy decrease, so that it is more suitable for fine surface treatment, avoiding excessive damage to the surface or causing too much waste.
