Sterile Centrifugal Pumps are specially designed for pharmaceutical, biotechnology and food industries. They have the advantages of no bacterial breeding, easy cleaning and drainage, a wide range of connection types, sanitary surface, no leakage, flexible installation and so on. There are mechanical, hydraulic and electromagnetic driving forces. For sterile flow applications, centrifugal models are available that retain the benefits of the Heavy-Duty Centrifugal but also include special design features that protect the product zone against contamination. Modifications assure that every potential entry point for contaminated air or liquid is bathed in sterile steam.
