Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Still drinks are beverages and drinks without carbonation. They lack fizziness or alcohol. They also include ready to drink beverages that contain artificial non-carbonated flavors and colorings. It comprises juice drinks that have lower fruit content and sports drinks which are hypotonic or isotonic in nature. Still drinks also include bottled water available in different flavors and functional beverages that are enriched with vital vitamins and minerals.

With a transparent methodology based on hundreds of bottom-up qualitative and

quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Still Drinks.

The global Still Drinks market size is projected to grow from US\$ million in 2022 to US\$ million in 2029; it is expected to grow at a CAGR of % from 2023 to 2029.

The most evident opportunity in the global still drinks market lies in cultivating consumers in the new urban areas in Asian, Latin American, and East European countries. The underdeveloped still drinks market in these countries means that an appreciable number of unharnessed opportunities still exist in key markets within these regions. However, even as companies do so, the focus needs to remain firmly on availability and affordability. Retail channels across several emerging countries still need to be developed to suit the distribution plans of beverage manufacturers and the competitive prices of sparkling and aerated drinks continue to be a roadblock in the growth of the still drinks market.

This report presents a comprehensive overview, market shares, and growth opportunities of Still Drinks market by product type, application, key manufacturers and key regions and countries.
