According to our LPI (LP Information) latest study, the global Stock Video market size was valued at US\$ 767.9 million in 2023. With growing demand in downstream market, the Stock Video is forecast to a readjusted size of US\$ 1306.2 million by 2030 with a CAGR of 7.9% during review period.

The research report highlights the growth potential of the global Stock Video market. Stock Video are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Stock Video. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Stock Video market.

The growing demand for stock videos captured by drones is trending in the market.

Stock videos captured through drones are extensively used in filmmaking. Earlier, videos shot using helicopters, airplanes, hot air balloons, and others were expensive. However, shooting videos on drones cost less and are also of high quality. As a result, the demand for stock videos captured on drones is increasing. It will contribute to the growth of the market during the forecast period. The growth momentum of the stock video market will accelerate over the forecast period and will register close to 7% CAGR.
