Abstracts

The global Stone Resin Line market size is predicted to grow from US$ 222 million in 2025 to US$ 341 million in 2032; it is expected to grow at a CAGR of 6.4% from 2026 to 2032.

Global sales of stone resin lines will reach approximately 1,300 units in 2024, with an average price of approximately $165,000 per unit and an overall gross profit margin of around 28%. A stone resin line is a continuous production system used for crack repair, reinforcement, and surface protection of stone slabs (such as marble and granite). It typically consists of a drying section, a gluing section, a curing section, a curing section, and an automatic conveyor. By filling the stone surface or cracks with epoxy or polyester resin and then curing it through heat, the system improves the stone's structural strength, color stability, and impermeability. The upstream supply chain primarily involves the supply of raw materials and accessories such as epoxy resin, curing agent, UV light source, and transmission system. The downstream market primarily serves marble processing plants, building stone companies, and high-end decorative engineering companies. Pedrini, a leading manufacturer in this field, boasts an annual production capacity of approximately 130–160 units, exporting extensively to Europe, Asia, and the Middle East.

United States market for Stone Resin Line is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Stone Resin Line is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
