The global Storage and Transportation Hydrogen Tanks market size is predicted to grow from US\$ 1216 million in 2025 to US\$ 3773 million in 2032; it is expected to grow at a CAGR of 17.9% from 2026 to 2032.

Hydrogen is most commonly stored as a gas or liquid in tanks for small-scale mobile and stationary applications. A variety of metal tanks are typically found at production facilities, transport terminals, and end-use locations.

With a focus on reducing carbon emissions, governments and industries are investing in hydrogen infrastructure. Favorable policies, technological advancements, and a growing awareness of hydrogen's potential are driving the demand for storage and transportation solutions. The European Parliament is implementing several measures to address CO2 emissions, one of which involves approving the European Climate Law. This legislation raises the European Union's target for reducing net greenhouse gas emissions by at least 55% by the year 2030.
