Strain gages are devices whose resistance changes under the application of force or strain. They can be used for measurement of force, strain, stress, pressure, displacement, acceleration etc.

Strain gages are of the structure, in which a metallic foil film in the thickness of a few microns is glued on a thin electrically insulated sheet (such as polyimide, polyester and so on). This foil film is cut down by photo-etching method in the shape of strain gages which can be made with the negative film masks of the strain gage patterns. These photo-etched strain gage patterns are trimmed to have a standard resistance value satisfying requirements as the strain gages. In addition, for strain gages in general applications, thermal resistance factors of the foil films are controlled to have three categories to match with the thermal elongation factors of 3 major and most popular materials of mild steel/11ppm, stainless steel/16ppm and aluminium alloy/23ppm, for which our strain gages can be self-temperature compensated to minimize temperature effects if specified so when ordering.

The global average price of Strain Gages is in the decreasing trend, from 886 USD/K Pcs in 2012 to 840 USD/ K Pcs in 2016. With the situation of global economy, prices will be in decreasing trend in the following five years.

Strain Gages demand has a certain space, but technical threshold is low, so the market is scattered. However, high end products concentrated in a small number of companies. Although production of Strain Gages brought a lot of opportunities, the study group recommends the new entrants just having money but without downstream support do not enter into the Strain Gages field abruptly.

According to this study, over the next five years the Strain Gage (Strain Gauge) market will register a 4.9% CAGR in terms of revenue, the global market size will reach US\$ 280 million by 2024, from US\$ 210 million in 2019. In particular, this report presents the global market share (sales and revenue) of key companies in Strain Gage (Strain Gauge) business, shared in Chapter 3.
