The global String-wound Sediment Filter market size is predicted to grow from US\$ 279 million in 2025 to US\$ 461 million in 2032; it is expected to grow at a CAGR of 7.6% from 2026 to 2032.

String-wound sediment filters are a variation of melt-blown filters. They are comprised of tightly wound cotton, polyester, or polypropylene string. This string is wrapped firmly around a core, creating a graded density that will trap particulate matter. As water travels through the layers of string, finer and finer particulate matter is removed. However, once string-wound filters become overloaded with sediment, the strings can begin to loosen and shift. This can allow debris back into the water and is an indication it is time for a filter replacement.

Water treatment refers to the whole process of adopting different water treatment processes and chemicals based on the water quality of the water to be treated, so that the water quality meets the requirements of production, life and environment. Water treatment agent is the chemical used for water treatment, also known as water treatment agent, is widely used in chemical, petroleum, light industry, textile, printing and dyeing, construction, metallurgy, machinery, urban and rural environmental protection and other industries, in order to achieve the purpose of water conservation, corrosion and scale inhibition and treatment of wastewater. According to the use of classification, water treatment agents can be divided into flocculants, anti-scaling agents, corrosion inhibitors and so on. In addition, water treatment agents also include various auxiliary agents, including defoamers, cleaning agents, pre-film agents, chelating agents, decolorizers, activated carbon, disinfectants and so on. With the increasingly serious problem of global water shortage and the gradual increase in people's concern for the environment, the global demand for water treatment chemicals

continues to increase. According to the data, the global water treatment chemicals market in 2022 totaled about 40 billion U.S. dollars.
