## Abstracts

The global Strip Inspection Machine market size is predicted to grow from US\$ 123 million in 2025 to US\$ 154 million in 2032; it is expected to grow at a CAGR of 3.4% from 2026 to 2032.

In 2025, the global production of tape inspection machines reached 17,894 units, with an average selling price of US\$7,000 per unit. The global annual production capacity of fully enclosed electric spectacle valves is approximately 25,000 units, with a gross profit margin of approximately 25.3%. Tape inspection machines, also called tape quality inspection instruments or tape inspection equipment, are devices specifically designed for inspecting, monitoring, and verifying the quality of tapes (such as electronic components, surface mount devices, wires and cables, plastic tapes, and other packaging materials). They play a crucial role in ensuring product quality and packaging safety in manufacturing, packaging, and logistics. The upstream of the tape inspection machine industry chain includes alloy materials, seals, and vibration sensors; the midstream consists of tape inspection machine manufacturers; and the downstream mainly comprises the electronics manufacturing, automation, and packaging industries.

The belt conveyor market continues to expand, driven by demand from industrial automation, smart mining, logistics, and warehousing. Core drivers include the need for improved operational safety of belt conveyor systems, early warning of equipment failures, energy optimization, and reduced maintenance costs, as well as increased demand for higher-precision temperature, vibration, tension, and load monitoring. With the application of edge computing, IoT, and cloud data analytics, manufacturers are enhancing their competitiveness through system integration, remote diagnostics, predictive maintenance, and digital maintenance services. The global market is influenced by raw material price fluctuations, industry regulations, industry

concentration, and regional infrastructure investment levels, exhibiting a pattern of regional growth and cyclical fluctuations, but the long-term outlook remains positive.
