A Stump Grinders or stump cutter is a power tool or equipment attachment that removes tree stumps by means of a rotating cutting disc that chips away the wood.

Stump Grinders can be the size of a lawn mower or as large as truck. Most accomplish their task by means of a high-speed disk with teeth that grinds the stump and roots into small chips.

A typical Stump Grinders incorporates a cutter wheel with fixed carbide teeth. The cutter wheel movements are controlled by hydraulic cylinders to push the cutter head laterally through the stump and to raise and lower it.

Stump grinding is generally performed by a qualified arborist or landscaper; however it is possible to rent them from tool hire companies for DIY projects.

Global Stump Grinders key players include Vermeer, Bandit Industries, Morbark, Toro, Caterpillar, etc. Global top five manufacturers hold a share about 50%.

North America is the largest market, with a share over 45%, followed by Europe and Asia-Pacific, both have a share over 45 percent.

In terms of product, Self-Propelled&Track Mounted is the largest segment, with a share about 65%. And in terms of application, the largest application is Municipal, followed by

Garden Management.
