Succulent plant, also known as succulents, are plants whose parts thicken, are succulent, and are full of food. Succulents are higher plants with hypertrophic vegetative organs, usually with three vegetative organs: root, stem and leaf, flower, fruit and seed. Compared to other plants, succulents survive easily, do not require the care of the breeder for a long time, and are radiation proof, decorative and air purifying. Succulents need little maintenance to survive indoors. Because it is the houseplant with very strong adaptability, can flourish below all sorts of indoor conditions.
