A sucker rod power tong is a specialized hydraulic or pneumatic tool used for mechanized making and breaking of sucker rod threaded connections in oilfield operations. Consisting primarily of a tong head, transmission mechanism, power system (hydraulic or pneumatic motor), and control system, it provides stable and adjustable torque, enabling fast, safe, and efficient tightening and loosening of the sucker rod during running or pulling out of the well. Widely used in well repair, pump inspection, and maintenance operations in oil wells, this device significantly replaces traditional manual tong operation, improving efficiency while reducing labor intensity and safety risks. It is an indispensable and critical tool in modern oil drilling and production operations.In 2024, the global production of sucker rod power tongs will reach 584,700 units, with an average selling price of US$1,336 per unit.
