Supply chain finance is a financial service model based on the supply chain, which integrates various links in the supply chain, optimizes supply chain operations, reduces supply chain costs, improves supply chain efficiency, and provides financial support such as fund flow. Supply chain finance mainly includes the following aspects:

Accounts receivable financing: Accounts receivable financing refers to the transfer of a

company's accounts receivable to a financial institution, which provides financing support. Through accounts receivable financing, companies can quickly obtain funds and improve liquidity.

Purchase financing: Purchase financing refers to suppliers applying for financing from financial institutions after the order is confirmed, which is used to purchase the necessary raw materials and other items for production. Through purchase financing, suppliers can obtain funds in a timely manner, improve production efficiency, and shorten the purchase cycle.

Inventory financing: Inventory financing refers to pledging the company's inventory of goods to a financial institution to obtain financing support. Through inventory financing, companies can quickly convert funds into liquid assets and improve the efficiency of capital utilization.

Logistics financing: Logistics financing refers to logistics service providers applying for financing from financial institutions during the logistics process, which is used for the capital required for logistics operations. Through logistics financing, logistics service providers can speed up the logistics process, improve efficiency, and reduce costs.

Supply chain finance can improve the efficiency of supply chain operations, optimize the cost structure of the supply chain, increase the trust of all parties in the supply chain, reduce the financing costs of enterprises, and improve the efficiency of capital utilization. At the same time, supply chain finance can also promote collaborative cooperation in the supply chain, strengthen risk management by all parties in the supply chain, and improve the stability and sustainability of the supply chain.
