Surface area and porosity analyzer (BET) is an instrument used to test data such as specific surface area, total pore volume, pore size distribution and adsorption-desorption curve of materials. The testing method of the instrument is BET analysis. Brunauer-Emmett-Teller (BET) surface area analysis is the multi-point measurement of an analyte's specific surface area (m²/g) through gas adsorption analysis, where an inert gas such as nitrogen is continuously flowed over a solid sample, or the solid sample is suspended in a defined gaseous volume.
