The research report highlights the growth potential of the global Surfactant for EOR market. Surfactant for EOR are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Surfactant for EOR. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Surfactant for EOR market.

The concept of recovering oil by surfactant flooding dates back to 1929 when De Groot was granted a patent claiming water-soluble surfactants as an aid to improve oil recovery. Currently, surfactant flooding boosts oil production by lowering interfacial tension, increasing oil mobility thus allowing better displacement of the oil by injected water. Surfactant EOR improves the wettability of porous rocks allowing water to flow through them faster displacing more oil.

Global core surfactant for EOR manufacturers include Stepan, BASF and CNPC. The top 3 manufacturers had a more than 50% combined market share. Asia Pacific is the largest region, with a share more than 45%, followed by Europe and Europe. In terms of product, anionic sulfonate is the largest segment, with a share over 65%. And in terms of application, the largest application is conventional oil field, followed by oil sands oil field.
