Surgical floor mats, also known as surgical floor runners or surgical floor drapes, are specialized mats or drapes used in operating rooms and surgical suites. These mats are designed to maintain a sterile environment by providing a clean and anti-slip surface for surgical staff to walk on during procedures. They are an essential part of infection control protocols within the surgical setting.

Surgical floor mats are typically sterile or treated to be antimicrobial to minimize the risk of infection and maintain a sterile surgical environment. They are designed to be anti-slip, providing a secure and stable surface for surgical staff to walk on, reducing the risk of accidents during surgeries. Surgical floor mats can be either disposable or reusable. Disposable mats are discarded after a single use, while reusable ones can be laundered and used multiple times. These mats are often fluid-resistant to prevent liquids, such as blood or other bodily fluids, from penetrating through and reaching the

floor. Some surgical floor mats provide cushioning and support to the surgical team, reducing fatigue during long surgical procedures.
