Abstracts

The global Surgical Instrument Repair Service market size is predicted to grow from US\$ 1683 million in 2025 to US\$ 2479 million in 2032; it is expected to grow at a CAGR of 5.7% from 2026 to 2032.

Surgical Instrument Repair Service refers to professional inspection, preventive maintenance, functional restoration, repair and refurbishment services for reusable instruments used in surgical procedures. The service primarily addresses general handheld instruments such as surgical scissors, forceps, clamps, needle holders, rongeurs and retractors, together with reusable minimally invasive, microsurgical, ophthalmic, orthopedic and other specialty instruments. Typical technical activities include sharpening, realignment and straightening, jaw and ratchet adjustment, welding or brazing, insert and component replacement, surface restoration, re-insulation, lubrication, performance testing and comprehensive refurbishment. Services may be delivered through centralized repair facilities, regional depots, mobile repair laboratories or embedded on-site technical teams. The core value proposition is to restore instruments to required functional and performance conditions, extend their usable life, reduce replacement expenditure and instrument downtime, and support reliable instrument availability for operating rooms and sterile processing departments. This study focuses on commercially delivered repair activities associated with reusable surgical instruments and analyzes the market by instrument family, service activity, delivery model, provider type, end user and region.

Key Findings

North America accounted for approximately 44% of 2025 market revenue and remained the largest regional market

The three leading provider groups represented roughly two-fifths of narrow-scope market revenue

The identified global vendor pool exceeds 60 providers, highlighting a highly fragmented long-tail supply structure

General reusable instruments form the core demand base, while minimally invasive and precision instruments require higher-value technical repair

On-site mobile repair and centralized depot repair increasingly operate as complementary service models

Market Trends

Surgical Instrument Repair Service is evolving from basic sharpening and mechanical correction toward broader instrument lifecycle management. Traditional repair activities such as sharpening, alignment, jaw adjustment and component replacement remain fundamental, but customers increasingly expect providers to handle laparoscopic instruments, microsurgical devices, specialty instruments and re-insulation work that requires higher technical precision. At the same time, service delivery is becoming more flexible. Large hospitals and health systems increasingly combine scheduled mobile repair, embedded technical support and centralized depot capabilities to shorten turnaround times and keep instrument sets available for procedures. Leading service organizations are also integrating asset information, repair history and preventive maintenance into their service models, shifting purchasing decisions away from isolated per-item repair toward recurring service relationships. STERIS, for example, publicly describes on-location repair, in-house repair laboratories, regional and national repair centers, as well as digital asset-management support within its instrument service offering. This transition favors providers that can combine technical depth, rapid turnaround, quality documentation and broad geographic coverage.

Market Dynamics

Drivers

The primary demand driver for Surgical Instrument Repair Service is the large installed base of reusable surgical instruments that experience progressive mechanical wear during repeated clinical use and reprocessing cycles. Scissors lose cutting

performance, forceps and needle holders develop alignment or ratchet issues, and specialty instruments may require component or insulation restoration over time. Professional repair can extend useful instrument life and reduce the need for premature replacement, creating a clear economic incentive for hospitals facing operating-room cost pressure and increasing procedure volumes. STERIS notes that regular maintenance and repair are required to maintain instrument functionality and can address sharpening, alignment, insert replacement and other forms of wear, while Agiliti positions repair as a means of extending useful life and reducing operating-room service costs. Growth in ambulatory surgery, minimally invasive procedures and high-value specialty instrument inventories further increases the commercial value of timely repair and preventive maintenance.

Restraints

Market expansion is constrained by the economics of replacement for lower-value instruments and by the growing use of disposable or single-use products in selected procedures. Where replacement instruments are inexpensive, repair costs, logistics and downtime can make direct replacement more attractive than refurbishment. The service market is also labor intensive and dependent on experienced technicians capable of restoring fine mechanical tolerances without compromising instrument performance. This limits rapid capacity expansion and creates regional differences in service quality. Another structural restraint is the heterogeneous nature of instrument inventories: hospitals may operate products from numerous manufacturers, specialties and generations, requiring providers to maintain broad technical knowledge and repair capability. In addition, complex instruments may need to be transferred from local mobile teams to centralized specialist facilities, increasing turnaround time. These factors prevent repair from becoming a fully standardized commodity service and favor providers that can maintain sufficient repair volume, technical specialization and quality control to achieve attractive operating economics.

Opportunities

The largest opportunities lie in higher-value repair categories and managed service models rather than simple commodity sharpening. Minimally invasive, microsurgical, ophthalmic and specialty instruments typically demand greater precision and can carry substantially higher replacement value, improving the economics of professional repair. Hospitals also represent an opportunity for broader preventive maintenance programs in which instruments are inspected systematically before significant deterioration leads to emergency replacement or procedure disruption. Mobile laboratories and embedded service teams can increase repair frequency and strengthen customer retention by

bringing technicians closer to sterile processing departments. Emerging markets provide an additional opportunity as reusable instrument inventories expand and hospitals develop more structured maintenance practices. Sustainability considerations also strengthen the long-term value proposition because extending the usable life of existing instruments can reduce material consumption and replacement demand. The market therefore offers room for providers that can move beyond transactional repair toward lifecycle management combining inspection, preventive maintenance, rapid repair, documentation and inventory-related support.

Challenges

The industry's principal challenge is maintaining consistent repair quality across a very broad range of instrument designs while controlling turnaround time and service cost. Repairs must restore instrument performance without materially altering safety specifications or intended use, making technical process control particularly important for complex or specialty work. In the United States, the FDA has clarified the distinction between servicing and remanufacturing: servicing is intended to return a device to the safety and performance specifications established by the original manufacturer, whereas activities that significantly change performance, safety specifications or intended use may constitute remanufacturing and carry different regulatory implications. This reinforces the importance of technician competence, repair documentation and clear process boundaries. At the same time, fragmented regional competition can create pricing pressure, while shortages of experienced repair technicians may limit scalability. Providers must therefore balance technical breadth, compliance discipline, turnaround performance and competitive pricing without compromising service quality.

Value Chain Analysis

The value chain of Surgical Instrument Repair Service begins with instrument manufacturers, component and insert suppliers, specialty tooling providers, repair consumables and technical training resources. These inputs support the central service layer, where OEM service organizations, independent third-party repair providers, manufacturer-repair hybrids and regional specialists perform inspection, sharpening, alignment, welding, component replacement, re-insulation, functional testing and refurbishment. Value creation is concentrated in skilled labor, diagnostic capability, repair process knowledge, logistics efficiency and quality assurance rather than in raw materials. For routine hand instruments, labor productivity and mobile-service density are important economic variables; for microsurgical and minimally invasive instruments, specialized technical expertise and precision processes account for a larger share of

service value.

Downstream customers include hospitals, ambulatory surgery centers, specialty surgical facilities and sterile processing organizations. Instruments typically flow from operating rooms through cleaning and sterile processing, where defects are identified and repair decisions are initiated. Providers then perform repairs either on-site or at regional and central facilities before instruments return to clinical inventory. The highest-value providers increasingly connect these steps through preventive maintenance schedules, repair histories, instrument tracking and contract-based service management. This changes the economics from individual repair transactions toward recurring account relationships, where turnaround time, asset availability, technical quality and reduced replacement spending become key sources of customer value.

Segment Insights

By instrument family, general reusable surgical instruments represent the broadest demand base because scissors, clamps, forceps, needle holders, retractors and related stainless-steel instruments are used across a wide range of procedures and require recurring sharpening, adjustment and mechanical restoration. However, minimally invasive, microsurgical, ophthalmic and other specialty instruments typically generate higher repair value per service event because of greater mechanical complexity, tighter tolerances and higher replacement costs. As procedural techniques become more specialized, the value contribution of these technically demanding categories is expected to rise even though general instruments continue to account for the largest volume of repair activity. Providers with expertise across both routine and specialty instruments are therefore better positioned to consolidate hospital repair spending.

By delivery model, on-site and mobile repair have gained strategic importance because they reduce transportation time and can return routine instruments to service rapidly, while centralized depot repair remains essential for complex procedures requiring specialist equipment or deeper refurbishment. Agiliti publicly describes nationwide on-site surgical instrument repair supplemented by centralized Centers of Excellence for more complex work, while STERIS similarly combines on-location service with regional and national repair centers. Hybrid service models are therefore becoming increasingly important for larger hospital systems seeking both immediate turnaround and access to advanced repair capabilities.

Downstream Market Opportunities

Hospitals remain the primary downstream opportunity because they operate the largest reusable instrument inventories and face continuous pressure to maintain procedure-ready sets while controlling replacement expenditure. Sterile processing departments are particularly influential in repair purchasing because they identify instrument wear, coordinate tray availability and manage the flow of instruments between procedures. Ambulatory surgery centers and specialty surgical facilities represent another attractive opportunity as outpatient procedures expand and facilities seek to operate leaner inventories with limited tolerance for instrument downtime. The strongest commercial opportunities are likely to occur where repair directly prevents costly replacement or operational disruption, particularly in minimally invasive, orthopedic, ophthalmic and microsurgical applications. Providers that can offer scheduled inspection, rapid mobile service, specialty depot capability and transparent repair documentation can address these needs more effectively than suppliers focused solely on ad hoc sharpening or basic mechanical work.

Regional Insights

North America remained the largest regional Surgical Instrument Repair Service market in 2025, contributing approximately 44% of global narrow-scope revenue in the study model. The region combines a large installed base of reusable instruments with mature outsourcing practices, extensive hospital networks and a well-developed independent repair ecosystem. Mobile repair is particularly established in the United States, allowing larger providers to serve hospital systems through recurring on-site programs while directing complex work to centralized facilities. Europe represented the second-largest regional market, with Germany and the United Kingdom benefiting from long-established surgical instrument manufacturing and repair capabilities. The European market has a comparatively strong presence of manufacturers that combine instrument production with technical repair services.

Asia-Pacific is more fragmented and presents a different growth profile. Japan has an established specialist ecosystem for steel and precision surgical instruments, while China remains less consolidated, with regional repair businesses and broader medical-equipment service companies gradually developing dedicated surgical instrument capabilities. Australia and New Zealand support several established independent specialists, whereas India combines instrument manufacturing with repair and refurbishment activities. These structural differences create opportunities for consolidation, standardized quality systems and broader service networks in emerging markets, while mature regions are more likely to grow through managed service penetration, higher-value specialty repair and acquisition-led consolidation.

Competitive Landscape Analysis

The global Surgical Instrument Repair Service market has a two-tier competitive structure in which a small group of scaled service organizations operates alongside a much larger population of regional and specialty providers. STERIS, Agiliti and B. Braun/Aesculap occupy prominent positions because of their broad service infrastructure, hospital relationships and technical capabilities, while companies such as Surgical Instrument Service Company, BPI Medical, MEDICON, FiberTech Medical, Pacific Surgical Holdings, MultiMedical Systems, US Medical Systems and Uniplex strengthen competition at the national or regional level. The market remains considerably more fragmented by company count than by revenue, and regional providers can retain meaningful positions through faster response, specialty expertise and close relationships with sterile processing departments. Scale nevertheless provides advantages in mobile technician coverage, centralized specialist facilities, quality systems and multi-site hospital contracting. Consolidation remains relevant: STILLE completed its acquisition of Surgical Holdings in August 2025, adding a UK surgical instrument repair operation to its broader surgical-instrument business. Over time, competitive advantage is expected to shift further toward providers that combine technical repair capability with preventive maintenance, lifecycle data, rapid turnaround and multi-facility service management.

Report Scope

LPI (LP Information)' newest research report, the "Surgical Instrument Repair Service Industry Forecast" looks at past sales and reviews total world Surgical Instrument Repair Service sales in 2025, providing a comprehensive analysis by region and market sector of projected Surgical Instrument Repair Service sales for 2026 through 2032. With Surgical Instrument Repair Service sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world Surgical Instrument Repair Service industry.

This Insight Report provides a comprehensive analysis of the global Surgical Instrument Repair Service landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyses the strategies of leading global companies with a focus on Surgical Instrument Repair Service portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Surgical Instrument Repair Service market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Surgical Instrument Repair Service and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Surgical Instrument Repair Service.

This report presents a comprehensive overview, market shares, and growth opportunities of Surgical Instrument Repair Service market by product type, application, key players and key regions and countries.

Market Segmentation

Segmentation by Type:

General Reusable Surgical Instruments

Minimally Invasive Surgical Instruments

Microsurgical Instruments

Ophthalmic Surgical Instruments

Orthopedic Surgical Instruments

Others

Segmentation by Service Delivery Model:

Mobile Repair

Off-site Repair

Embedded Vendor-managed Service

Others

Segmentation by Commercial Model:

Per-instrument Repair

Per-set Service

Time and Materials

Others

Segmentation by Application:

Hospitals

Ambulatory Surgery Centers

Specialty Clinics and Surgical Centers

Others

This report also splits the market by region:

Americas

United States

Canada

Mexico

Brazil

APAC

China

Japan

Korea

Southeast Asia

India

Australia

Europe

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

- 2.1 World Market Overview
 - 2.1.1 Global Surgical Instrument Repair Service Market Size (2021-2032)
 - 2.1.2 Surgical Instrument Repair Service Market Size CAGR by Region (2021 VS 2025 VS 2032)
 - 2.1.3 World Current & Future Analysis for Surgical Instrument Repair Service by Country/Region (2021, 2025 & 2032)
- 2.2 Surgical Instrument Repair Service Segment by Type
 - 2.2.1 General Reusable Surgical Instruments
 - 2.2.2 Minimally Invasive Surgical Instruments
 - 2.2.3 Microsurgical Instruments
 - 2.2.4 Ophthalmic Surgical Instruments
 - 2.2.5 Orthopedic Surgical Instruments
 - 2.2.6 Others
 - 2.2.7 Surgical Instrument Repair Service Market Size by Type
 - 2.2.7.1 Surgical Instrument Repair Service Market Size CAGR by Type (2021 VS 2025 VS 2032)
 - 2.2.7.2 Global Surgical Instrument Repair Service Market Size Market Share by Type (2021-2026)
- 2.3 Surgical Instrument Repair Service Segment by Service Delivery Model
 - 2.3.1 Mobile Repair
 - 2.3.2 Off-site Repair
 - 2.3.3 Embedded Vendor-managed Service
 - 2.3.4 Others
 - 2.3.5 Surgical Instrument Repair Service Market Size by Service Delivery Model

2.3.5.1 Surgical Instrument Repair Service Market Size CAGR by Service Delivery Model (2021 VS 2025 VS 2032)

2.3.5.2 Global Surgical Instrument Repair Service Market Size Market Share by Service Delivery Model (2021-2026)

2.4 Surgical Instrument Repair Service Segment by Commercial Model

2.4.1 Per-instrument Repair

2.4.2 Per-set Service

2.4.3 Time and Materials

2.4.4 Others

2.4.5 Surgical Instrument Repair Service Market Size by Commercial Model

2.4.5.1 Surgical Instrument Repair Service Market Size CAGR by Commercial Model (2021 VS 2025 VS 2032)

2.4.5.2 Global Surgical Instrument Repair Service Market Size Market Share by Commercial Model (2021-2026)

2.5 Surgical Instrument Repair Service Segment by Application

2.5.1 Hospitals

2.5.2 Ambulatory Surgery Centers

2.5.3 Specialty Clinics and Surgical Centers

2.5.4 Others

2.5.5 Surgical Instrument Repair Service Market Size by Application

2.5.5.1 Surgical Instrument Repair Service Market Size CAGR by Application (2021 VS 2025 VS 2032)

2.5.5.2 Global Surgical Instrument Repair Service Market Size Market Share by Application (2021-2026)

3 SURGICAL INSTRUMENT REPAIR SERVICE MARKET SIZE BY PLAYER

3.1 Surgical Instrument Repair Service Market Size Market Share by Player

3.1.1 Global Surgical Instrument Repair Service Revenue by Player (2021-2026)

3.1.2 Global Surgical Instrument Repair Service Revenue Market Share by Player (2021-2026)

3.2 Global Surgical Instrument Repair Service Key Players Head office and Products Offered

3.3 Market Concentration Rate Analysis

3.3.1 Competition Landscape Analysis

3.3.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)

3.4 New Products and Potential Entrants

3.5 Mergers & Acquisitions, Expansion

4 SURGICAL INSTRUMENT REPAIR SERVICE BY REGION

- 4.1 Surgical Instrument Repair Service Market Size by Region (2021-2026)
- 4.2 Global Surgical Instrument Repair Service Annual Revenue by Country/Region (2021-2026)
- 4.3 Americas Surgical Instrument Repair Service Market Size Growth (2021-2026)
- 4.4 APAC Surgical Instrument Repair Service Market Size Growth (2021-2026)
- 4.5 Europe Surgical Instrument Repair Service Market Size Growth (2021-2026)
- 4.6 Middle East & Africa Surgical Instrument Repair Service Market Size Growth (2021-2026)

5 AMERICAS

- 5.1 Americas Surgical Instrument Repair Service Market Size by Country (2021-2026)
- 5.2 Americas Surgical Instrument Repair Service Market Size by Type (2021-2026)
- 5.3 Americas Surgical Instrument Repair Service Market Size by Application (2021-2026)
- 5.4 United States
- 5.5 Canada
- 5.6 Mexico
- 5.7 Brazil

6 APAC

- 6.1 APAC Surgical Instrument Repair Service Market Size by Region (2021-2026)
- 6.2 APAC Surgical Instrument Repair Service Market Size by Type (2021-2026)
- 6.3 APAC Surgical Instrument Repair Service Market Size by Application (2021-2026)
- 6.4 China
- 6.5 Japan
- 6.6 South Korea
- 6.7 Southeast Asia
- 6.8 India
- 6.9 Australia

7 EUROPE

- 7.1 Europe Surgical Instrument Repair Service Market Size by Country (2021-2026)
- 7.2 Europe Surgical Instrument Repair Service Market Size by Type (2021-2026)
- 7.3 Europe Surgical Instrument Repair Service Market Size by Application (2021-2026)

7.4 Germany

7.5 France

7.6 UK

7.7 Italy

7.8 Russia

8 MIDDLE EAST & AFRICA

8.1 Middle East & Africa Surgical Instrument Repair Service by Region (2021-2026)

8.2 Middle East & Africa Surgical Instrument Repair Service Market Size by Type (2021-2026)

8.3 Middle East & Africa Surgical Instrument Repair Service Market Size by Application (2021-2026)

8.4 Egypt

8.5 South Africa

8.6 Israel

8.7 Turkey

8.8 GCC Countries

9 MARKET DRIVERS, CHALLENGES AND TRENDS

9.1 Market Drivers & Growth Opportunities

9.2 Market Challenges & Risks

9.3 Industry Trends

10 GLOBAL SURGICAL INSTRUMENT REPAIR SERVICE MARKET FORECAST

10.1 Global Surgical Instrument Repair Service Forecast by Region (2027-2032)

10.1.1 Global Surgical Instrument Repair Service Forecast by Region (2027-2032)

10.1.2 Americas Surgical Instrument Repair Service Forecast

10.1.3 APAC Surgical Instrument Repair Service Forecast

10.1.4 Europe Surgical Instrument Repair Service Forecast

10.1.5 Middle East & Africa Surgical Instrument Repair Service Forecast

10.2 Americas Surgical Instrument Repair Service Forecast by Country (2027-2032)

10.2.1 United States Market Surgical Instrument Repair Service Forecast

10.2.2 Canada Market Surgical Instrument Repair Service Forecast

10.2.3 Mexico Market Surgical Instrument Repair Service Forecast

10.2.4 Brazil Market Surgical Instrument Repair Service Forecast

10.3 APAC Surgical Instrument Repair Service Forecast by Region (2027-2032)

- 10.3.1 China Surgical Instrument Repair Service Market Forecast
- 10.3.2 Japan Market Surgical Instrument Repair Service Forecast
- 10.3.3 Korea Market Surgical Instrument Repair Service Forecast
- 10.3.4 Southeast Asia Market Surgical Instrument Repair Service Forecast
- 10.3.5 India Market Surgical Instrument Repair Service Forecast
- 10.3.6 Australia Market Surgical Instrument Repair Service Forecast
- 10.4 Europe Surgical Instrument Repair Service Forecast by Country (2027-2032)
 - 10.4.1 Germany Market Surgical Instrument Repair Service Forecast
 - 10.4.2 France Market Surgical Instrument Repair Service Forecast
 - 10.4.3 UK Market Surgical Instrument Repair Service Forecast
 - 10.4.4 Italy Market Surgical Instrument Repair Service Forecast
 - 10.4.5 Russia Market Surgical Instrument Repair Service Forecast
- 10.5 Middle East & Africa Surgical Instrument Repair Service Forecast by Region (2027-2032)
 - 10.5.1 Egypt Market Surgical Instrument Repair Service Forecast
 - 10.5.2 South Africa Market Surgical Instrument Repair Service Forecast
 - 10.5.3 Israel Market Surgical Instrument Repair Service Forecast
 - 10.5.4 Turkey Market Surgical Instrument Repair Service Forecast
- 10.6 Global Surgical Instrument Repair Service Forecast by Type (2027-2032)
- 10.7 Global Surgical Instrument Repair Service Forecast by Application (2027-2032)
 - 10.7.1 GCC Countries Market Surgical Instrument Repair Service Forecast

11 KEY PLAYERS ANALYSIS

- 11.1 STERIS plc
 - 11.1.1 STERIS plc Company Information
 - 11.1.2 STERIS plc Surgical Instrument Repair Service Product Offered
 - 11.1.3 STERIS plc Surgical Instrument Repair Service Revenue, Gross Margin and Market Share (2021-2026)
 - 11.1.4 STERIS plc Main Business Overview
 - 11.1.5 STERIS plc Latest Developments
- 11.2 Agiliti, Inc.
 - 11.2.1 Agiliti, Inc. Company Information
 - 11.2.2 Agiliti, Inc. Surgical Instrument Repair Service Product Offered
 - 11.2.3 Agiliti, Inc. Surgical Instrument Repair Service Revenue, Gross Margin and Market Share (2021-2026)
 - 11.2.4 Agiliti, Inc. Main Business Overview
 - 11.2.5 Agiliti, Inc. Latest Developments
- 11.3 B. Braun SE

- 11.3.1 B. Braun SE Company Information
- 11.3.2 B. Braun SE Surgical Instrument Repair Service Product Offered
- 11.3.3 B. Braun SE Surgical Instrument Repair Service Revenue, Gross Margin and Market Share (2021-2026)
- 11.3.4 B. Braun SE Main Business Overview
- 11.3.5 B. Braun SE Latest Developments
- 11.4 Surgical Instrument Service Company
 - 11.4.1 Surgical Instrument Service Company Company Information
 - 11.4.2 Surgical Instrument Service Company Surgical Instrument Repair Service Product Offered
 - 11.4.3 Surgical Instrument Service Company Surgical Instrument Repair Service Revenue, Gross Margin and Market Share (2021-2026)
 - 11.4.4 Surgical Instrument Service Company Main Business Overview
 - 11.4.5 Surgical Instrument Service Company Latest Developments
- 11.5 BPI Medical
 - 11.5.1 BPI Medical Company Information
 - 11.5.2 BPI Medical Surgical Instrument Repair Service Product Offered
 - 11.5.3 BPI Medical Surgical Instrument Repair Service Revenue, Gross Margin and Market Share (2021-2026)
 - 11.5.4 BPI Medical Main Business Overview
 - 11.5.5 BPI Medical Latest Developments
- 11.6 MEDICON eG
 - 11.6.1 MEDICON eG Company Information
 - 11.6.2 MEDICON eG Surgical Instrument Repair Service Product Offered
 - 11.6.3 MEDICON eG Surgical Instrument Repair Service Revenue, Gross Margin and Market Share (2021-2026)
 - 11.6.4 MEDICON eG Main Business Overview
 - 11.6.5 MEDICON eG Latest Developments
- 11.7 FiberTech Medical
 - 11.7.1 FiberTech Medical Company Information
 - 11.7.2 FiberTech Medical Surgical Instrument Repair Service Product Offered
 - 11.7.3 FiberTech Medical Surgical Instrument Repair Service Revenue, Gross Margin and Market Share (2021-2026)
 - 11.7.4 FiberTech Medical Main Business Overview
 - 11.7.5 FiberTech Medical Latest Developments
- 11.8 Pacific Surgical Holdings Ltd.
 - 11.8.1 Pacific Surgical Holdings Ltd. Company Information
 - 11.8.2 Pacific Surgical Holdings Ltd. Surgical Instrument Repair Service Product Offered

11.8.3 Pacific Surgical Holdings Ltd. Surgical Instrument Repair Service Revenue, Gross Margin and Market Share (2021-2026)

11.8.4 Pacific Surgical Holdings Ltd. Main Business Overview

11.8.5 Pacific Surgical Holdings Ltd. Latest Developments

11.9 MultiMedical Systems

11.9.1 MultiMedical Systems Company Information

11.9.2 MultiMedical Systems Surgical Instrument Repair Service Product Offered

11.9.3 MultiMedical Systems Surgical Instrument Repair Service Revenue, Gross Margin and Market Share (2021-2026)

11.9.4 MultiMedical Systems Main Business Overview

11.9.5 MultiMedical Systems Latest Developments

11.10 US Medical Systems

11.10.1 US Medical Systems Company Information

11.10.2 US Medical Systems Surgical Instrument Repair Service Product Offered

11.10.3 US Medical Systems Surgical Instrument Repair Service Revenue, Gross Margin and Market Share (2021-2026)

11.10.4 US Medical Systems Main Business Overview

11.10.5 US Medical Systems Latest Developments

11.11 Uniplex (UK) Ltd
