Surround Sound A/V Processors are the brains of all mid to high end home theater systems. They are similar to AV receivers in that they provide source switching and decoding, audio/video processing and volume control for various surround sound formats. But unlike an AV receiver, a Surround Sound Preamp has no built-in amplification and is dedicated to serving as the 'brain' of the system. This means they generally have more processing power available. Includes additional channels, flexible adjustment and calibration options. They also cost more because higher quality components must be included to improve performance.

The global market for Surround Sound A-V Processors is estimated to increase from US\$ million in 2021 to reach US\$ million by 2028, exhibiting a CAGR of % during 2022-2028. Keeping in mind the uncertainties of COVID-19 and Russia-Ukraine War, we are continuously tracking and evaluating the direct as well as the indirect influence of the pandemic on different end use sectors. These insights are included in the report as a major market contributor.

The APAC Surround Sound A-V Processors market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

The United States Surround Sound A-V Processors market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

The Europe Surround Sound A-V Processors market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

The China Surround Sound A-V Processors market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

Global key Surround Sound A-V Processors players cover NAD, Premium Audio, Sound United, Yamaha and Harman, etc. In terms of revenue, the global largest two companies occupy a share nearly % in 2021.
