## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Recycled gold and silver jewelry means the metals used in the creation of jewelry pieces don't require the harmful mining process. Recycling precious metals, gemstones, and diamonds produces fewer emissions than those mined. For example, gold or silver ore must be refined by extracting the metals from the rocks. This process requires environmentally harmful solvents that often end up in the water and can kill aquatic life and animals.
