The global Sustainable Straw market size is predicted to grow from US\$ 892 million in 2025 to US\$ 1482 million in 2032; it is expected to grow at a CAGR of 7.7% from 2026 to 2032.

The sustainable straw market is experiencing a significant trend of growth and increased demand due to various factors: Rising environmental consciousness: With increasing awareness about the harmful effects of single-use plastic straws on the environment, consumers and businesses are actively seeking alternatives. Sustainable straws, such as those made from biodegradable materials like bamboo, paper, metal, or glass, are gaining popularity as they offer a more eco-friendly option. Government regulations and bans: Many countries and cities have implemented bans or restrictions on single-use plastic straws to reduce plastic waste. These regulations create a demand for sustainable alternatives, leading to the growth of the sustainable straw market.
