## Abstracts

The global Swimming Quick-Drying Towel market size is predicted to grow from US$ 2654 million in 2025 to US$ 3656 million in 2032; it is expected to grow at a CAGR of 4.8% from 2026 to 2032.

A quick-drying swim towel is a lightweight, highly absorbent, and quick-drying towel designed specifically for use after swimming. Made from microfiber or other quick-drying materials, it absorbs moisture quickly and dries quickly, reducing the burden of carrying. Its lightness and softness make it suitable for swimming, travel, or outdoor activities, providing comfort and freshness, making it an ideal choice for swimmers and athletes. In 2024, the global quick-drying swim towel market was expected to have a unit price of US$14 per towel, with sales of approximately 186.3 million towels. The average annual production capacity per line ranges from 800,000 to 1.2 million towels, resulting in an industry profit margin of approximately 15% to 25%.

Upstream: Core players are chemical fiber raw material suppliers, providing polyester (polyester) and polyamide (nylon), the primary raw materials for microfiber production. Other suppliers include dyes, chemicals, auxiliaries (for increased absorbency), and packaging materials. Downstream: These products ultimately reach individual consumers through online e-commerce platforms (such as Amazon and Taobao), sporting goods retailers (such as Decathlon), outdoor sports brands, and B-end customers such as hotels and gyms.

United States market for Swimming Quick-Drying Towel is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
