Swivel head shear is a highly flexible metal shearing tool, characterized by a shear head that can be rotated within a certain angle range, usually up to 360 degrees, allowing the operator to flexibly adjust the shearing direction during the cutting process. This design makes it particularly suitable for precise shearing of complex contours, curves or narrow areas, and is often used in sheet metal processing, metal roof installation, ventilation system production and other work scenarios that require high mobility. Swivel Head Shear is mostly driven by electricity or pneumatics, suitable for shearing a variety of metal materials such as steel, stainless steel, aluminum, etc., while significantly reducing hand fatigue and the risk of miscutting while improving work efficiency.

United States market for Swivel Head Shear is estimated to increase from US\$ million in 2024 to US\$ million by 2031, at a CAGR of % from 2025 through 2031.
