## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Synchronous drives (often called timing belt drives) differ from V-belt drives in that they have a tooth profile and require sprockets with teeth that create a direct engagement with the synchronous belt. Synchronous drive components improve performance of motor-driven systems, increasing energy efficiency and lowering maintenance costs. Synchronous drive allows adjustment of speed and torque while connecting mechanically rotating components; belts and pulleys utilize teeth to prevent slippage and unwanted speed variations.

The global market for Synchronous Drive Products is estimated to increase from US\$ million in 2021 to reach US\$ million by 2028, exhibiting a CAGR of % during 2022-2028. Keeping in mind the uncertainties of COVID-19 and Russia-Ukraine War, we are continuously tracking and evaluating the direct as well as the indirect influence of the pandemic on different end use sectors. These insights are included in the report as a major market contributor.

The APAC Synchronous Drive Products market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

The United States Synchronous Drive Products market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

The Europe Synchronous Drive Products market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

The China Synchronous Drive Products market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.
