Syndiotactic Polystyrene (or Syndiotactic Polystyrene, SPS) is a kind of crystal polystyrene engineering plastic which is different from normal polystyrene's in spatial structure. The structure of the product is regularly alternately spaced and it makes its properties different from normal polystyrene especially the resistance of heat and drug. Syndiotactic Polystyrene provides a good balance and competes well against other materials in a wide variety of applications.

Global core manufacturers of syndiotactic polystyrene include Idemitsu Kosan, LG Chem, etc. Idemitsu Kosan is the world's largest manufacturer of syndiotactic polystyrene, accounting for approximately 79% of the market share.

In terms of product types, glass fiber reinforced grade occupies a dominant position, accounting for 93% of the market share. At the same time, in terms of applications, automotive electronic parts are the largest application field, accounting for 38%.
