There are the two major types of lace wigs available in the global market, including lace front wigs and full lace wigs. Lace front wigs have lace at the forehead which extend from ear to ear. This type of wigs provide an illusion of the natural hair line in the front. As the lace is only present in the front half of the wig, thus the wig allows the wearer to part hair, on any side. Further, lace front wigs are gaining popularity around the world as they provide more realistic appearance, offers versatility of hair parting and are more comfortable to wear, when compared with the full lace wigs.
