Artificial synthetic marble, also known as granite, is a high-performance decorative material made by mixing, molding, grinding and polishing natural marble or granite crushed stone as filling material, combined with cement, gypsum or unsaturated polyester resin as adhesive. Artificial synthetic marble has many advantages of natural marble in appearance and performance, while overcoming the shortcomings of natural stone such as fragility and difficulty in processing. According to the different material composition and manufacturing process, artificial synthetic marble can be divided into cement type, resin type, composite type and sintered type. Among them, resin type artificial synthetic marble occupies a dominant position in the market, especially UPR resin products, which have a market share of up to 80% and are widely used in interior decoration. They are popular for their excellent waterproof performance and beautiful texture effect.

Market Overview of Artificial Synthetic Marble

Artificial synthetic marble is widely used in the bathroom field, mainly used in the production of wash basins, bathtubs, wall panels and shower cubicles. Its durability, waterproof, antibacterial and anti-fouling properties make it an ideal choice for modern interior decoration. At the same time, its rich texture and design are comparable to natural stone, meeting consumers' dual needs for beauty and functionality. In the fiercely competitive decorative materials market, artificial synthetic marble has always maintained a solid market position in the bathroom field. The global artificial synthetic

marble market presents a highly competitive pattern, with the top ten companies holding a combined market share of 12.67%. Major companies include LOTTE Chemical, LX Hausys, Guangdong Zhongxun New Materials, Wanfeng Stone, etc., which continue to promote market development with their high-quality products and innovative designs.

Market development trend of artificial synthetic marble

The production of artificial synthetic marble is mainly concentrated in China, South Korea and Europe, and the sales market is spread all over the world. With the rapid development of the construction and interior decoration industries, especially the increasing demand for high-performance materials in the bathroom field, the artificial synthetic marble market is expected to continue to grow. Acrylic resin artificial synthetic marble will occupy a larger market share in the future due to its environmental performance and excellent quality. At the same time, the continuous upgrading of process technology and the trend of design diversification enable artificial synthetic marble to meet a wider range of application needs. In addition, the industry's emphasis on sustainable development is driving production companies to transform towards greening and recycling, injecting new growth momentum into the market.
