Tailgate Control Unit is an automotive electronic control module used to manage power tailgate opening, closing, anti-pinch protection, position memory, remote operation, sensor input, and body control communication. It is widely used in SUVs, crossovers, MPVs, electric vehicles, and premium passenger cars with electric or smart tailgate systems.

The industrial chain of Tailgate Control Unit covers upstream components such as microcontrollers, power chips, sensors, relays, circuit boards, connectors, housings, wiring harnesses, software, and testing equipment. The midstream consists of circuit design, software development, SMT assembly, module packaging, functional calibration, environmental testing, and vehicle validation. Downstream applications mainly include passenger vehicles, electric vehicles, power tailgate systems, smart access systems, automotive aftermarket retrofit, and vehicle body electronics.

The continuous upgrading of automobile intelligent configuration and convenient travel concept boost the market demand of tailgate control units. It realizes electric opening,

closing and intelligent sensing control of vehicle tailgates, greatly improving vehicle use convenience. Anti-pinch protection and stable signal output enhance driving and using safety.
