Tamper evident labels are security labels that can detect unauthorized access to any protected object. Tamper evident labels have self-adhesive material at the base and make use of frangible face material. When tampered, it is not possible to re-apply these labels and the amount of damage done to the face material of tamper evident labels serves as indicator that the protected product is damaged or tampered with.

Various technologies are used in tamper evident labels, such as RFID tags, barcode and NFC tags. Tamper evident labels are widely used across pharmaceutical industry, automotive, food and beverage and transport among others.
