The global Temporary Power Generation & Power Rental market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

Increasing power consumption for industrial and commercial applications has built up a demand-supply gap in the power market. This gap is even more evident during the peak hours for electricity consumption. Increasing power demand, lack of grid stability & support and low electrification rates are the major driving factors of the power rental market in the utilities segment. Lacking of electricity access, aging T&D infrastructure are driving the UK market for power rental solutions. The rise in UK construction and infrastructural activities are driving the UK market for power rental solutions. Increasingly frequent business activities are also a stimulating factor.

In UK?Temporary Power Generation/Power Rental key players include Aggreko, HSS, Power Electrics, Generator Power, Speedy Hire, etc. These top five manufacturers hold a share over 50%.

In terms of product, Diesel is the largest segment, with a share over 90%. And in terms of application, the largest application is Government & Utilities, followed by Industrial, Construction, etc.
