The global Temporary Tattoos market size is predicted to grow from US\$ 1840 million in 2025 to US\$ 2978 million in 2032; it is expected to grow at a CAGR of 7.2% from 2026 to 2032.

Temporary tattoos are non-permanent decorative body art products applied to the skin for short-term visual effects, typically lasting from several hours to a few days, and easily removable without invasive procedures. They are commonly produced using transfer printing, cosmetic-grade inks, and skin-safe adhesives, and are widely used in personal fashion, children's entertainment, promotional events, festivals, and brand marketing activities. From a value chain perspective, upstream activities include specialty inks, adhesive films, transfer papers, and packaging materials, midstream processes focus on graphic design, printing, coating, cutting, and quality control, while downstream demand is driven by consumers, retailers, event organizers, brand owners, and e-commerce platforms. In 2025, the average selling price of temporary tattoos is approximately US\$0.38 per unit, with global sales volume reaching around 4,950 million units. The industry maintains a 40%–65% gross margin, supported by low material costs, scalable printing processes, frequent repurchase behavior, and customization premiums.

United States market for Temporary Tattoos is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Temporary Tattoos is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
