Tent carpet is a ground covering designed for the interior of an outdoor camping tent, aiming to improve comfort, insulation and overall living experience inside the tent. It is usually made of wear-resistant, moisture-proof and easy-to-clean materials such as polyester, nylon, foam or natural fibers such as wool and cotton. These carpets not only provide a soft touch, making campers feel more comfortable, but also effectively isolate moisture and cold from the ground, preventing moisture and cold at the bottom of the tent from being transferred to the human body, thereby improving thermal insulation performance.

The global Tent Carpet market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
