## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Textured carpet refers to a type of carpet characterized by its surface having a varied and distinct texture, often achieved by using fibers of different lengths or employing various weaving techniques during its manufacturing process. This type of carpet showcases an intricate surface appearance, providing a more nuanced and interesting visual effect. The textured surface of the carpet tends to mask footprints and vacuum marks more effectively than some other carpet types.

The global Textured Carpet market size is projected to grow from US\$ million in 2023 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
