Calcium D-pantothenate, chemical name

N-(?,?-dihydroxy-?,?-dimethylbutyryl)-?-alanine calcium, commonly known as vitamin B5, is a component of coenzyme A.

From the perspective of the market size of the industry, with the development of society and economy, the improvement of people's health awareness, and the intensification of the aging trend of the population, the market prospect of calcium pantothenate is very broad. According to statistics, the market size of China's calcium pantothenate industry will reach 7.27 billion yuan in 2022, and it is expected that the market size will exceed 8 billion yuan in 2023. Due to the overcapacity of the domestic vitamin industry, export is the main demand. According to China Customs data, in 2022, the export volume of China's calcium pantothenate industry will be 11,800 tons, a year-on-year decrease of 38.49%, and the export value will be 255 million yuan, a year-on-year increase of 37.84%. Prices have risen significantly due to supply and demand. From the distribution of export regions, Europe, Asia and North America are my country's main export regions, accounting for 87.3% in total in 2022. In terms of specific countries, the United States and Belgium are my country's main exporters. In 2022, the export markets of the two countries will account for 21.7% and 18.1% respectively. Followed by the Netherlands (9.2%), Germany (6.1%), Brazil.
