The global Thermal Paper Color Former ODB-2 market size is predicted to grow from US\$ 347 million in 2025 to US\$ 425 million in 2031; it is expected to grow at a CAGR of 3.4% from 2025 to 2031.

The ODB-2(CAS 89331-94-2) is thermal & pressure sensitive dyes. The other name of ODB-2 is 2-Anilino-6-dibutylamino-3-methylfluoran. The ODB-2 can be applied in the conventional way as a color former by the application of an aqueous coating composition to a pre-coated base paper followed by drying and calendaring. The coating composition will also contain appropriate amounts of various additives including color developer and sensitizer. The performance of ODB-2 will therefore be governed to some extent by the choice of the other coating components in the coating formulation as well as the quality of the base paper. A top coat may be applied on the thermal layer as a protective coating. ODB-2 is suitable for using as a color former in most carbonless paper applications. Main component for black image formulations or as shading component for other color image formulations. ODB-2 can be used as a color former for both thermal and carbonless paper. In thermal paper, this takes the form of applying an aqueous coating composition to a pre-coated base paper. This coated paper is then dried and calendared. Appropriate amounts of different additives such as color developer and sensitizer will also be contained in the composition.

Thermal Paper Color Former ODB-2 is a crucial chemical additive used in the production of thermal paper, which finds extensive applications in today's society for receipts, labels, tickets, and printer paper, among others. Market trends for ODB-2 highlight its significance in the paper manufacturing industry. With the continuous advancement of digital technology, paper remains an indispensable part of the business and retail sectors, leading to a steady growth in demand for thermal paper. ODB-2, as a

vital color former for paper, not only ensures print quality but also helps reduce production costs, making it competitive in the market.
