Thermal spray powder essentially refers to the powder material that will be melted in-flight and then deposited on a prepared substrate to form a protective coating.

The North American region dominated the market share. The aircraft production industry is booming in the Asia-Pacific and South American regions. Countries, such as China and India, are witnessing growth in the aircraft passenger travel rate, owing to the rising consumer incomes and increasing airport infrastructure network. Aerospace sector is expected to dominate the market demand. The market for thermal spray powder is anticipated to register a CAGR of over 6% during the forecast period. Some of the major factors driving the growth of the market studied are the increasing demand for higher performance customized alloy powders, increasing prominence for plasma spray coatings, and extensive consumption of thermal sprayed tungsten-cobalt coatings.
