The global Thermoplastic Polyurethane Conveyor Belt market size is predicted to grow from US\$ 2818 million in 2025 to US\$ 4262 million in 2032; it is expected to grow at a CAGR of 6.1% from 2026 to 2032.

In 2025, global sales of thermoplastic polyurethane (TPU) conveyor belts reached approximately 160 million square meters, with an average selling price of US\$18 per square meter. TPU conveyor belts are a type of high-performance industrial conveyor belt made primarily of TPU material through extrusion or casting, combined with a fabric or steel wire core layer. They possess both thermoplastic processability and excellent wear resistance, oil resistance, hydrolysis resistance, and microbial resistance, making them widely used in continuous conveying scenarios such as food processing, logistics sorting, packaging, pharmaceuticals, electronics, and light manufacturing. They are particularly suitable for automated production lines with high requirements for hygiene and operational stability. The upstream raw materials mainly include TPU resin, reinforcing fabric substrate, additives, and a small amount of auxiliaries; downstream supply relationships are mainly with conveyor equipment OEMs, system integrators, and end-user factories. Currently, the global total production capacity of TPU conveyor belts is approximately 230 million square meters per year, mainly concentrated in Europe, China, and Southeast Asia, with an overall industry gross profit margin between 25% and 40%. The future lies in developing towards food-grade high durability, antibacterial formulas, lightweight high-strength structures, and modular quick-change features. Coupled with the upgrading of logistics automation, the improvement of food safety standards, and the increase in demand for flexible manufacturing, this product still has room for continued growth and clear business opportunities in the fields of high-end conveying and smart factories.

United States market for Thermoplastic Polyurethane Conveyor Belt is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
